Portfolio: vinothjv.netlify.app

PROFESSIONAL SUMMARY

Data Engineer with 3+ years of experience designing and building scalable data platforms and cloud-native data pipelines. Skilled in Lakehouse (Medallion) architecture, ETL/ELT development using PySpark, Apache Airflow, dbt, SQL, and Python, with experience in Docker and Kubernetes. Hands-on expertise in Generative AI, including ReAct-based AI Agents, RAG, NL2SQL, and LangChain. Microsoft Certified in Azure and Microsoft Fabric, passionate about delivering scalable, AI-powered data solutions.

EDUCATION

Government College of Engineering, Salem

2019 – 2023

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.7

CERTIFICATIONS

- | | |
|---|---------------------|
| • Microsoft Certified: Fabric Data Engineer Associate (DP-700) | Jun 2025 – Jun 2027 |
| • Microsoft Certified: Fabric Analytics Engineer Associate (DP-600) | Dec 2024 – Dec 2026 |
| • Microsoft Certified: Azure Data Scientist Associate (DP-100) | Jun 2024 – Jun 2026 |

EXPERIENCE

Big Data Engineer (Full-Time)

Aug 2023 – Present

Saturam Infosystems Pvt. Ltd., Bengaluru

- Architected and delivered AI-powered Enterprise Analytics Platforms featuring ReAct-based AI Agents, enabling natural language to SQL (NL2SQL) across multiple enterprise datasets and significantly reducing manual SQL effort.
- Designed and developed a self-service Data Ingestion Platform that dynamically generates Apache Airflow DAGs for master and incremental data loads across configurable source and destination systems.
- Implemented Medallion Lakehouse Architecture (Bronze, Silver, Gold) using dbt, PySpark, and SQL with SCD Type 1 & Type 2 transformations, automated testing, and data quality validation.
- Built scalable ETL/ELT pipelines integrating MySQL, PostgreSQL, SQL Server, BigQuery, REST APIs, and cloud storage using Apache Airflow and custom operators.
- Delivered enterprise-scale financial and logistics data marts processing over 1.5M+ records daily, supporting AR/AP reporting, invoice reconciliation, shipment analytics, and operational dashboards.
- Developed AI-assisted analytics solutions using LangChain, RAG, vector databases, and Azure OpenAI to enable conversational business intelligence and document search.
- Led cloud-native data platform implementations on Google Cloud Platform and Microsoft Azure, leveraging BigQuery, Cloud Storage, Microsoft Fabric, OneLake, Azure Data Factory, and Synapse.
- Containerized applications using Docker and deployed workloads on Kubernetes (GKE), while automating CI/CD pipelines with GitLab, Azure DevOps, and infrastructure provisioning using Ansible.

Software Developer (Internship)

Aug 2021 – Sep 2022

Honeycomb Technologies, Ohio, USA

- Developed responsive web applications using AngularJS, React.js, JavaScript, HTML5, CSS3, and Firebase, focusing on performance, scalability, and reusable component architecture.
- Built REST API integrations, implemented authentication workflows, optimized frontend performance, and collaborated with cross-functional teams following Agile development practices.

PROJECTS

AI-Driven Enterprise Data Ingestion & Analytics Platform

- Designed a ReAct-based AI Agent (LangChain + NL2SQL) enabling business users to query enterprise databases via natural language — supporting dynamic multi-table joins and contextual follow-up questions.
- Built a web-based self-service ingestion configurator that auto-generates and schedules Airflow DAGs for master loads and incremental/CDC-based ingestion from multiple RDBMS sources.
- Implemented full Medallion Lakehouse (Bronze/Silver/Gold) with dbt Core, SCD Type 1 & 2, and layered data quality validation (T1→T3).
- Containerized full platform with Docker; deployed to Kubernetes for production — ensuring auto-scaling, fault tolerance, and zero-downtime deployments.

AR/AP Financial Data Mart — Logistics Client

- Modelled 20+ years of unstructured logistics financial data (1.5 M records/day) into clean dbt-driven data marts covering receivables, payables, vehicle expenses, and invoice reconciliation.
- Automated end-to-end Airflow orchestration for scheduled dbt runs, reconciliation reports, and financial dashboards surfacing profit margins and payment-level tracking.

Warranty Analytics — GCP

- Ingested warranty data from MySQL, MSSQL, BigQuery, and REST APIs via Apache Airflow with custom Operators for validation and data-integrity enforcement.
- Deployed Google Cloud Functions and Dockerized services on GKE using Ansible; built aggregated dashboards to identify failure patterns and streamline claims.

Spend Analytics — Azure

- Built Azure Data Factory pipelines for DB2 → PostgreSQL data transfer.
- Designed spend-pattern data marts with RBAC and secure secret management.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Bash/Shell Scripting, JavaScript (Working Knowledge)

Data Engineering: Apache Airflow, dbt Core (SCD Type 1 & 2), PySpark, ETL/ELT, Lakehouse Architecture (Medallion), Apache Kafka, Databricks, CDC, Incremental Data Processing

Generative AI & LLMs: LangChain, ReAct Agents, Retrieval-Augmented Generation (RAG), NL2SQL, Vector Databases, Neo4j, Prompt Engineering, AI Agent Development

Cloud Platforms:

GCP: BigQuery, Cloud Storage (GCS), Dataproc, Dataflow, Pub/Sub, Cloud Composer, Cloud SQL, Cloud Run, Vertex AI, Google Kubernetes Engine (GKE)

Azure: Azure Data Factory (ADF), Synapse Analytics, Microsoft Fabric, OneLake, Azure Databricks, ADLS Gen2, Azure OpenAI Service, Azure AI Search, Azure Functions, Azure Kubernetes Service (AKS), Azure Key Vault

Databases & Storage: PostgreSQL, MySQL, Microsoft SQL Server, BigQuery, ClickHouse, MongoDB, Cloud Object Storage

DevOps & Platform Engineering: Docker, Kubernetes, Git, GitLab CI/CD, Azure DevOps, Ansible

Analytics & Visualization: Apache Superset, Microsoft Power BI, Data Mart Design, Semantic Layer

Data Management: Data Modeling, Schema Evolution, Data Quality & Validation, Data Governance, Monitoring & Logging

ACHIEVEMENTS

- Budding Star Award (2025) — Saturam Infosystems Pvt. Ltd.
- Rookie Trophy (2024) — Saturam Infosystems Pvt. Ltd.
